PROFESSIONAL SUMMARY

Computer Engineer specialised in Software Engineering, with a backend foundation (Java, Spring, SQL) and experience building web products end to end. I apply machine learning to real business problems: fine-tuning language and vision models and integrating LLMs.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/TypeScript, C#, C++, SQL, HTML/CSS

Frameworks & Libraries: Spring, React, Next.js, Angular, ASP.NET, GWT, Mockito

AI / ML: LLM/VLM fine-tuning (LoRA, PEFT, Unsloth), AI API integration (DeepSeek, Gemini, Gemma), OCR pipelines

Databases: PostgreSQL, MySQL, Oracle, Supabase

Tools & DevOps: Git, Docker, Vercel, RunPod, JBoss, Maven, LaTeX, CI/CD

Methodologies: Scrum/Agile, TDD, unit testing

PROJECTS

Scannet — Final Degree Project (TFG) — *React, Vite, Supabase, DeepSeek-OCR2 (LoRA), RunPod, Vercel*

Need: digitalise data from purchase receipts, removing manual data entry.

Idea: combine OCR with a fine-tuned vision-language model to extract structured data automatically.

AI Order Automation — *Spring Boot, React, MySQL, WhatsApp API (Meta), DeepSeek, JWT, Docker*

Need: orders arrived as informal WhatsApp messages and required manual transcription.

Idea: use an LLM (DeepSeek) to interpret natural language and generate structured orders automatically.

Self-hosted Portfolio — jonathanthorpe.dev — *React 19, Vite, nginx, Hetzner VPS, TLS/certbot, GitHub Actions CI/CD, IaC*

Need: build DevOps skills hands-on in a real project running in production.

Idea: leverage my personal portfolio to self-manage the full cycle (server, TLS, CI/CD, hardening) and set it up to deploy future web apps.

Online Store — *Spring Boot, JSP, MySQL, Selenium (E2E)*

Need: give a local business its own online sales channel.

Idea: build a full-stack e-commerce solution for a small local business.

Web Application for an English Academy (Star-Group internship) — *C#, ASP.NET MVC, SQL Server*

Need: a local English academy needed to digitalise the management of its activity.

Idea: address the real business needs of a local company with a tailor-made web application.

WORK EXPERIENCE

Junior Developer — Indra Producción Software

Jan 2021 – Oct 2021

- Backend development and maintenance in Java 8 with Spring and Oracle.
- Implementation of unit tests (Mockito).
- Database management and SQL queries.
- Deployment on JBoss server and front-end development with GWT.
- Work under Scrum methodology and use of Git.

Web Application Developer — All Natura S.L.

Oct 2020 – Jan 2021

- Web page design and layout.
- Customisation of the Odoo CRM.

Developer Intern — Star-Group

Apr 2020 – Jun 2020

- Individual development of a web application for an English academy (ASP.NET).
- Work under agile Scrum methodology.

EDUCATION

BSc in Computer Engineering — University of Almería

2021 – 2026

Specialisation in Software Engineering

Higher Technician in Multiplatform Application Development (DAM)

2018 – 2020

IES Los Montecillos

Technician in Microcomputer Systems and Networks (SMR)

2016 – 2018

IES Gerald Brenan

LANGUAGES Spanish: Native | English: Native
